Summary

Experience:

I have been working in post-production since 2011. In 2019, I decided to focus specifically on visual composition. Throughout my career, I have had the opportunity to collaborate with several production companies and TV channels in Brazil, working on soap operas, films and series on platforms such as Amazon, Netflix and Globoplay, as well as advertising campaigns. This experience has allowed me to develop an eye for detail and skills that help in the creative side of my current work.

Skills:

My experience in post-production has allowed me to work with a variety of software. I have worked for many years with Smoke, Flame and After Effects, gaining a solid foundation and technical skills. Currently, I am focused on using Nuke, but I am expanding my knowledge into the 3D area, studying Maya and Unreal Engine.

Additional Information:

I am always looking to learn and grow professionally, seeking to improve my skills and knowledge every day. I am excited to take on new projects where I can apply my experience creatively and contribute significantly to the success of the teams and companies I work with.

Languages: Portuguese (native), English (intermediate proficiency in speaking and writing)
